

the FrontProject

The early years springboard

JANE HUNT

CEO, THE FRONT PROJECT

INCOMING CHAIR, FUTURE TRACKS

OUR VISION

- > That all Australian children are thriving from the start and driving our national prosperity.

OUR MISSION

- > To ensure all Australian leaders and the community are committed to placing a new value on the early years, and for all Australian children to have the 21st Century attributes they need to thrive.

THEORY OF CHANGE

Universal access to quality early learning and care for three and four year old children in Australia.

IF ...

- The early childhood education sector leaders have the capacity to work together to advocate, design and shape a system that delivers better outcomes for children
- The Australian community changes their behaviour and is educated about the benefits of early childhood investment
- Business and community leaders use their influence to become champions for children
- Relevant and timely economic modelling, research and policy are developed

THEN...

There will be policy and investment change for universal early learning and care for all children aged 3 and 4 years in Australia.

Systems Change:

Mindsets, System components, Connections, Regulations,
Resources, Power
